PROJECTS

Feed the Frontline

[Github | Feed the Frontline](#)

- A Django web application for connecting donors, restaurants and healthcare workers on the frontline
- Consumes both Google Maps and Google Places APIs to geolocate existing restaurants and healthcare facilities, store them in the database and display them as markers on an interactive map for end users

Xplor

[GitHub | Xplor](#)

- Xplor is a travel app that encourages people to travel more and get out there and explore the world
- Built on a Mern stack it allows users to keep track of travel destinations and see current weather forecasts

Music Discovery App

[Github | Music Discovery](#)

- A CRUD web app built using MongoDB, Express, EJS, Node.js & Materialize that allows users to track music
- It allows a user to keep track of their favorite artists as well as their albums
